The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY WHICHEVER IS LONGER, FROM THE MAILING DA: - Extensions of time may be available under the provisions of 37 CFR 1.13 after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period was reply received by the Office later than three months after the mailing earned patent term adjustment. See 37 CFR 1.704(b).	ATE OF THIS COMMUNICATION 36(a). In no event, however, may a reply be tin will apply and will expire SIX (6) MONTHS from a cause the application to become ABANDONE	N. nely filed the mailing date of this communication. D (35 U.S.C. § 133).				
Status						
1) Responsive to communication(s) filed on 21 Ap	<u>oril 2005</u> .					
2a) This action is FINAL . 2b) ⊠ This	This action is FINAL . 2b)⊠ This action is non-final.					
	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4)⊠ Claim(s) <u>1-27</u> is/are pending in the application.						
4a) Of the above claim(s) is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
6) Claim(s) is/are rejected.						
7) Claim(s) is/are objected to.						
8)⊠ Claim(s) <u>1-27</u> are subject to restriction and/or €	election requirement.					
Application Papers						
9) ☐ The specification is objected to by the Examine	г.					
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11)☐ The oath or declaration is objected to by the Ex	aminer. Note the attached Office	Action or form PTO-152.				
Priority under 35 U.S.C. § 119						
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:						
1. Certified copies of the priority documents have been received.						
2. Certified copies of the priority documents have been received in Application No						
3. Copies of the certified copies of the priority documents have been received in this National Stage						
application from the International Bureau						
* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 2891

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4, 8-18, drawn to an organic semiconductor with a polymer layer different from the gate insulating film containing a copolymer of methylmethacrylate and divinylbenzene.

Group II, claims 5-7, drawn to an organic semiconductor with a polymer layer different from the gate insulating film containing Formula I or Formula II as claimed.

Group III, claims 19-21 and 27, drawn to a process for producing an organic semiconductor with a polymer layer different from the gate insulating film containing a copolymer of methylmethacrylate and divinylbenzene; the polymer layer being formed on the insulating layer.

Group IV, claim 22, drawn to a process for producing an organic semiconductor with a polymer layer different from the gate insulating film containing a copolymer of methylmethacrylate and divinylbenzene; the polymer layer being formed on an organic semiconductor layer which is formed on the insulating layer.

Group V, claims 23-25, drawn to a process for producing an organic semiconductor with a polymer layer different from the gate insulating film containing Formula I or Formula II as claimed; the polymer layer being formed on the insulating layer.

Group VI, claim 26, drawn to drawn to a process for producing an organic semiconductor with a polymer layer different from the gate insulating film containing Formula I or Formula II as claimed; the polymer layer being formed on an organic semiconductor layer which is formed on the insulating layer.

Application/Control Number: 10/532,078 Page 3

Art Unit: 2891

- 2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature of the Group I invention is the polymer layer, which is different from the insulating film formed in contact with the organic semiconductor layer. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. US 2003/0102471 A1 teaches an organic semiconductor device with a substrate (Para. 0014), an organic semiconductor (Para. 0028), a gate insulating film (Para. 0020), and conductors (Para. 0018, 0025) and a polymer layer (Para. 0032) which is different than the gate insulating film. The polymer contains a copolymer of methyl methacrylate and divinylbenzene (Para. 0041-0044). Group II teaches that the polymer layer is Formula I or Formula II, which is not a copolymer of methyl methacrylate and divinylbenzene. The device of Group I can be made by a process different that Groups III and IV, since the processes of Groups III and IV can produce products wherein the polymer layer is not in contact with the organic semiconductor layer. Groups III and IV are mutually exclusive methods as shown above. The device of Group II can be made by a process different that Groups V and VI, since the processes of Groups V and VI can produce products wherein the polymer layer is not in contact with the organic semiconductor layer. Groups V and VI are mutually exclusive methods as shown above.
- 3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve

Page 4

a right to petition, the election must be made with traverse. If the reply does not distinctly and

specifically point out supposed errors in the restriction requirement, the election shall be treated

as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably

distinct, applicant should submit evidence or identify such evidence now of record showing the

inventions or species to be obvious variants or clearly admit on the record that this is the case. In

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the

evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the

inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR

1.48(b) and by the fee required under 37 CFR 1.17(i).

Contact Information

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Matthew W. Such whose telephone number is (571) 272-8895.

The examiner can normally be reached on Monday - Friday 9AM-5PM EST.

Application/Control Number: 10/532,078 Page 5

Art Unit: 2891

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bradley W. Baumeister can be reached on (571) 272-1722. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
